

LAN cable tester, continuity tester **GGM DIAGLC90**

The remote cable tester is a versatile and rugged hand held tester designed for testing UTP, ScTP and SSTP cables for opens, shorts, reversals, miss wiring and split pairs. LC90 will also test T568A/B, 10/100/1000 Base T and Token Ring configurations. Easy to read display indicates cable condition. The tester is supplied in a padded nylon soft carrying case. By using the remote, you'll be able to test any installed links from one end to another (distance up to 100m). This model is powered by a single 9V alkaline battery, supplied for instant use.
